Remote Control Battery Replacement and Charging

When the button on the surface of the remote control is pressed, if the indicator light on the remote control does not switch on or the wireless transmission has no effect, the remote control battery should be replaced at this time; S3 uses a 1220 button battery, and the replacement method is as follows:

1. Remove the silicone case as shown (remove it first, then take it)

2. Separate the case with your fingers

3. Remove the battery

4. Input the new battery (please note the positive and negative polarity of the battery)

When the S3 battery is too low to stop working, the tail light will emit: Dadada... sound to remind when charging, the light flashes slowly, and when it is full, it turns off automatically.
