-03-

How to use smart brakes

This product has a brake warning function. Due to the diversity and complexity of road conditions, 100% successful detection cannot currently be guaranteed. Please do not use the brake indicator as the only criterion for safety judgment.

Turn on the smart brake function: in the charging state, long press the power button, the light will flash.

Turn off the smart brake function: in the charging state, press and hold the power button again, the 4 lights below the light will always be highlighted.

-04-

How to charge

This product has a built-in rechargeable battery. Please use a DC 5V, 1A charger or a computer USB port to recharge the device.

Input:
MRICO-USB,
DC 5V, 1A
